With support for Linux, Windows Server, SQL Server, Oracle, IBM, and SAP, Azure Virtual Machines give you the flexibility of virtualization for a wide range of computing solutions—development and testing, running applications, and extending your datacenter. It's the freedom of open-source software configured the way you need it. It's as if it was another rack in your datacenter, giving you the power to deploy an application in seconds instead of weeks.

Azure Virtual Machines support IBM, Oracle, Red Hat, SAP, SQL Server, Linux, and Windows Server
